

## PRELIMINARY

### Crystal-clear mask for booth lights and windows

*A faster, more convenient way to protect glass in your booth.*

Like90 SeeThru™ provides an amazingly clear, super-thin protective film that won't distort your booth's lighting or visibility.

- Easy to apply
- Prevents overspray from sticking to glass surfaces.
- Dries quickly
- Long-lasting protection
- Easily removed with water
- Water-based, non-hazardous, and VOC-compliant
- One 16 oz. can covers the glass in a typical automotive paint booth

#### Directions for Use:

- For optimal lighting and visibility, clean glass surfaces first and remove existing paint overspray and other contamination.
- Spray a thin, even film in a consistent manner on all glass surfaces requiring protection. Avoid drips and runs.
- After the initial coat has dried, spray a second thin coat in a similar manner.
- Remove coating with water and agitation when overspray begins to affect lighting or visibility.
- Allow glass surfaces to dry completely and re-apply as before.

**NOTE:** Like90 SeeThru is designed to protect against incidental overspray, not solid coats of paint. Do not allow overspray to build up to the point where water cannot reach the dry film to dissolve it.
