

Temporary Gloss Simulator for Color Matching

A faster, more convenient way to match color for a repair.

Like90 Quick Check[™] simulates the depth and clarity of fresh clear on base, eliminating the need to spray expensive clear coat on spray-out cards*. Unlike clear coat, Quick Check:

- Can be sprayed anywhere that is convenient or wherever the lighting is best for matching color.
- Dissipates completely so that another color coat can be applied to the same spray-out card if the first try does not match.
- Requires no clean-up and contains no isocyanates.

Unlike wax and grease remover, Quick Check:

- Doesn't smell.
- Sprays on the surface more evenly, better simulating the glossy finish of a clear coat.
- Stays wet long enough to allow plenty of time to judge a color match, even in hot, dry weather.
- Won't distort metallic lays.
- Dissipates completely without leaving any residue behind.

Directions for Use:

- Color matching: Spray on base coat color paddle (spray-out card) to create a temporary glossy surface. Repeat this process until an optimum color match has been achieved. (To accelerate evaporation, use compressed air, hand-held dryer or other air movement.)

***NOTE:** The UV blockers in a clear coat may slightly affect the cast of certain colors compared to what you see with Quick Check. Use the appropriate clear coat to confirm your final match.

Coverage: Approximately 150 spray-out cards per can
Packaging: Part number 10030; 10 oz. aerosol; 12 aerosols per case
Regulatory: Contains no CFCs; VOC: Product category not regulated
